

MULLERIAN

Vol - 15

July - October, 2004

EDITORIAL

Dear reader,

I am happy to present to you the combined issue of July & October of Mullerian. We are here with almost everything which has taken place in Fr Muller in the past 6 months. We are also having a mega event that is Homoeopathic Conference 2004 scheduled to be on 11th and 12th of December. It will be a special occasion to be with Dr Robin Murphy, a well known Repertorian. National Level Homoeopathic Quiz will be another attraction in this Conference. Mullerian invites you all to this mega event of the year and make it a grand success. Your participation will boost our efforts in propogating Homoeopathy as an effective system. As announced in the last issue, we are presenting the case of a mentally challenged child. Fr Muller Homoeopathic Medical College has taken up a project of treating the mentally challenged children at Chethana centre for disabled. A well organized clinical study is conducted here and the results are encouraging after the use of Homoeopathic medicines. This is one among the cases, which is under treatment in this center.

We invite your sincere opinions and suggestions for the further improvement of Mullerian. We have received lots of communications regarding the subscription for Mullerian and make it available for everyone. As a matter of fact, Mullerian is a collection of information shared regarding Homoeopathic knowledge and also Fr Muller Homoeopathic Medical College and Hospital. So those of our readers who want to support this publication or want it to be sent to their friends may send in any contribution in favour of Fr Muller Homoeopathic Medical College.

Enjoy reading and sharing your experiences with Mullerian.

Dr Shivaprasad K
Editor

YOUR SUPPORT FOR SOUVENIR OF POST-CENTENARY SILVER JUBILEE

The Post-Centenary Silver Jubilee Souvenir Committee has decided to present complementary copies of the Souvenir to all current students and ex-students of Father Muller Institute of Health Sciences. To partly underwrite the cost of the Souvenir, we seek your goodwill in securing advertisements for the Souvenir or place a message yourself as per rates noted in the insert in this issue. The message will carry your name and address in a two line panel. Details about the mechanical data, rates, etc., are given in the insert. We look forward to your support to your alma mater.

A case from Chethana Centre for mentally disabled children treated by Dr Guruprasad, M.D. (Hom.)

PRELIMINARY DATA:

Name : Mast V

Age : 12

School : 7th Std

Mangalore

5/3/04

CHIEF COMPLAINT:

Location	Sensation	Modalities	Concomitants
Mind Since 4 yrs of age	Hyperactive. Restless doesn't sit in place. Poor academic performance Not interested in studying Imitates others Irritated easily, shamelessness Gets angry fast — impulsive Playful. No eye to eye contact. Cannot concentrate in one object for a long time	A/F: Father's death after Not better with Modern medicines & psychotherapy.	

HISTORY OF PRESENTING ILLNESS:

He was apparently normal child till the age of 4 years. But there was a sudden change in his behavioral pattern after his father's death. 3 days after father's death he started asking about his father, he developed fever (101°F). He was much attached to his father.

LIFE SPACE INVESTIGATION:

12 years old Mast V, hailed from a middle class family of Mangalore. He is the 3rd child to his parents. He has got 2 elder sisters, both of them are studying and they are in good health. His mother is working. His father was a bank employee.

At 4 years of age his father died due to massive heart attack. They didn't show the body and funeral to him. After 3 days he started repeatedly asking about his father. Finally they explained him that his father is dead. Same day he got high temperature 101°F, and got convulsions. After that they noticed changes in his behavioral pattern. He started becoming restless, hyperactive and it was uncontrollable to them. They received complaints from teachers.

He plays with children smaller than his age. He is very poor in mathematics. Presently studying in 7th std. When he sees someone like watchman, policeman, officer he says he wants to become like them. Everyday different type of person he wanted to be. He is constantly changing his decision. When visitors are in his home, he tries to imitate them in order to attract attention towards him. Very shy to talk to strangers, doesn't look at people's eye, and always looks down.

He gets angry very fast. He catches others neck with anger like throttling. After that he realizes his mistakes and asks repeatedly (pardon). Teachers always complaint that he doesn't concentrate on his studies, and fails. So he doesn't like his teachers since they complain. He gets good marks in Kannada and Hindi subjects. Whatever teachers write in blackboard he writes but can't write fast enough. All-empty spaces in-between his notes. He likes poems, music. He knows about film stars, cricket players, singers. He has fear of going to bathroom. Even if he goes he doesn't want to close the door. Even while sleeping wants someone should hold him or

else he holds them. Wants mother should be always with him. He considers his sister like his father. Whatever mood he is on when his sister tells he obeys her.

PATIENT AS A PERSON:

Appearance : lean, tall, stoop shouldered
 Mouth : salivation like bubbles while speaking.
 Perspiration : generally less, no stains, no odors.
 Appetite : good.
 Cr : salty items, boiled egg²,
 Av : Onions, potatoes, sweets³.
 Bowels : once \ day.

BIRTH & DEVELOPMENTAL HISTORY:

FTND: Delay in progression of labour pain, 7 years gap between him and his sister.

Dentition: 6 – 7 month, walking: 1. 5 years, speech: 1.5 – 2 years, breast-feeding till 1.5 years.

 Shy :
 Shameless:
 Imitates → attention seeking
 Sympathetic: advises when others not well.
 Impatient

THERMAL STATE:

Ambithermal.

PHYSICAL EXAMINATION:

O\E: Pulse 76\mt.
 No signs of pallor, cyanosis, clubbing, icterus.
 White spots on nails, long fingers, Wt. : 39 kg
 Systemic examination: RS, CVS, and ABDOMEN clinically normal.

DIAGNOSIS:

ADHD with Behavioral disorder.

Management:

First prescription: 5/3/04:

1. Sac lac 8P HS daily

2. R ii pills. 3 – 3- 3

Following rubrics were considered for repertorisation.

1. Mind – Fear – thunderstorm of
2. Mind – Obstinate, headstrong
3. Mind - Impulsive
4. Mind – Concentration – difficult
5. Mind – Magnetized – desire to be
6. Mind – Timidity
7. Mind – Ailments from grief
8. Mind – Remorse
9. Mouth – Salivation – profuse
10. Generals – Food and Drinks – salt - desire
11. Generals – Food and Drinks – eggs – desire
12. Generals – Food and Drinks – sweets - aversion
13. Generals – Food and Drinks – onions - aversion

Remedies coming up are – Phos: - 26/13,

Calc :- 20/13, Caust: - 17/13

FOLLOW UP CRITERIA:

1	Appetite
2	Sleep
3	Bowels
4	Hyper activity
5	Eye to eye contact
6	Salivation bubbling
7	Fear
8	Irritability – impulsive.
9	Memory
10	Shyness

12/3/04:

1	2	3	4	5	6	7	8	9	10
Ok	S	R	S	S	S	S	S	S	S

Very stubborn in taking medicines, more irritable, shouts and hits mother, wants to play with computer always.

Rx: 1. Phosphorus 200 2P
2. NO ii pills.

26/3/04

1	2	3	4	5	6	7	8	9	10
G	G	R	>+	S	>+	>	S	S	>

Fever since yesterday. Thirst increased, no convulsions.

Irritability same. Doesn't prepare all subjects. Likes to play, and doesn't like to go to school.

O/E: palms are cold, head is hot, and eyes are red,
Temp: 100°F

1. Belladonna 200 15 P (1-1-1)
2. Rii pills

27/4/04:

1	2	3	4	5	6	7	8	9	10
G	G	R	>+	S	>+	>	S	S	>

Fever was came down next day itself. Generally parents feel he is better than before. Gets anger fast but controls. He doesn't like his mother telling his problems to doctors. After going home he shouts at mother.

Rx: 1. Phosphorus 200 2P
2. Rii pills.

21/5/04

1	2	3	4	5	6	7	8	9	10
G	G	R	>++	S	>++	S	>++	G	>

Follows his own timetable in studies and other activities.

75%> according to mother.

Rx: 1. Phosphorus 200 2P
2. Rii pills.

11/6/04:

1	2	3	4	5	6	7	8	9	10
G	G	R	>++	S	>++	S	>++	G	>

Irritated since 3 days because TV connection was removed because he is spending much time in front of TV. H\O Injury to leg.

O/E: bruised marks at knee joint (Rt side)

His notes are complete. He got B grade in his homework. Earlier C or D grades he used to get. Teachers and parents both are happy in his academic performance.

Rx: 1. Phosphorus 200 2P
2. Rii pills.

2/7/04:

1	2	3	4	5	6	7	8	9	10
G	G	R	>++	>	0	0	0	G	>

Speaks properly. In exams he secured 45%. All note books are complete. Writes even Hindi notes, draws pictures, no restlessness, sits in place for long time during consultation. Speaks relevant to the question asked, intellectually ok.

Rx: 1. Phosphorus 200 2P
2. Rii pills.

DISCUSSION:

For effectiveness of the treatment it's always better to assess qualitatively how much relief is obtained by the patient scientifically by using certain tools.

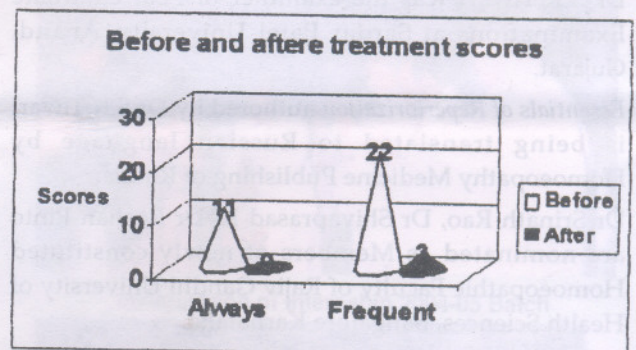

This case was evaluated according the **SENSORY PROFILE** of "The Psychological Corporation" USA. There are several Criteria under various headings with key marks like always, frequently, occasionally, seldom and never. Under each criterion like sensory processing there are several points, which were evaluated both before as well as after the treatment.

Sensory processing		Always	Frequent	Occasional	Seldom	Never
	Before (B)	1	2	1	0	4
	After (A)	0	0	0	0	4
Visual processing	B	1	0	0	0	8
	A	0	0	1	0	8
Vestibular processing	B	0	0	0	0	10
	A	0	0	0	0	10
Touch processing	B	1	4	2	0	11
	A	0	0	5	0	11
Multi sensory processing	B	1	2	0	2	1
	A	0	0	2	3	1
Oral sensory processing	B	0	0	6	4	2
	A	0	0	4	6	2
Sensory processing related to endurance / tone	B	3	1	0	1	3
	A	0	0	4	1	3
Modulation related to body position & movement	B	0	0	2	2	5
	A	0	0	0	3	6
Modulation of movement affecting activity level	B	1	2	0	0	1
	A	0	1	2	0	1
Modulation of sensory input affecting emotional responses.	B	0	2	0	2	1
	A	0	0	2	1	1
Modulation of visual input affecting emotional responses & activity level	B	0	1	2	0	1
	A	0	0	2	1	1
Behavioral & emotional responses	B	2	5	2	0	0
	A	0	0	6	3	0
Behavioral outcomes of sensory processing	B	0	2	0	0	1
	A	0	0	2	0	1
Items indicating thresholds for response	B	1	1	1	0	0
	A	0	2	1	0	0

So from the above chart it is evident that treatment score before and after is reduced. Always and frequent criteria are reduced after the intake of Phosphorus.

Scientific studies are essential to tell the effectiveness of Homoeopathy in mentally challenged children.

(We welcome opinions regarding the case presented - Editor)

READER'S VIEWS

It has been a very good source of contemporary information on Homoeopathy more so of the clinical kind. Keep it up. My wishes are with you.

- Dr.Sudhanshu Arya, Director, Sudeh – Suman Swasthya Sevayen.

CAMPUS NEWS
